

The 100 Series Casement Window uses three types of weatherstrip; a primary, leaf, and bulb weatherstrip. Please use the diagram below to identify where each type is used.

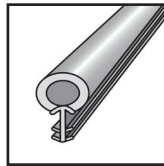

Primary Weatherstrip

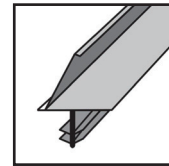

Primary – used around the entire perimeter of the sash.

Bulb Weatherstrip

Bulb – used on the top of the sash, closest to the inside of the home

Leaf Weatherstrip

Leaf – used on both sides of the sash, closest to the outside of the home.
